iTECH Fusion USER GUIDE:

Everything you need to know about the iTECH Fusion Smartwatch

What's in the box?

Your iTECH Fusion box includes:

- iTECH Fusion Smartwatch
- Clamp Charging Cable
(Color and material vary)

The iTECH Fusion comes in a variety of colors and materials, which are sold separately.

Setting up your iTECH Fusion Smartwatch

For the best experience, use the iTECH Wearables app for iPhones and Android phones. A smartphone is required for call, text, and smartphone app notifications.

Charge Your Smartwatch

A fully charged iTECH Fusion has a battery life of up to 7 days (standby time).

Battery life and charge cycles vary based on usage.

1. Plug the charging cable into the USB port on your computer or a UL-certified USB wall charger.
2. Insert the watch into the charging cable clamp.
The pins on the charging base must lock securely with the smartwatch. A battery icon appears on the screen to indicate your smartwatch is charging.

Note: Your iTECH Fusion takes about 2 hours to fully charge.

Set Up with Your Smartphone

The free iTECH Wearables app is compatible with most iPhones and Android Phones.

To get started:

1. Find the iTECH Wearables app in one of the locations below, depending on your smart device.
 - Apple App Store for iPhones
 - Google Play Store for Android Phones
2. Download and install the iTECH Wearables App

YOUR iTECH Fusion Smartwatch WILL ONLY WORK WITH THE iTECH Wearables APP SHOWN ABOVE.

This watch only functions with this app and there will be connectivity issues if the incorrect app is used. For more information and links to the app, go to: www.itechwearables.com/setup

3. When the app is installed, open it to be guided through a series of questions that help you create a profile. Continue to follow the on-screen instructions to connect your iTECH Fusion Smartwatch to your smartphone. (We highly encourage the user to allow all notifications & pairing access to their smartphones.)
4. To connect & sync your smartwatch to your device, tap on **click to connect** to search for your iTECH Fusion Smartwatch.

Search and select iTECH Fusion to pair.

Please read through the guide to learn more about your new smartwatch and then explore the iTECH Wearables App.

See your data in the iTECH Wearables App

Sync iTECH Fusion Smartwatch to transfer your data to the app, where you can view your exercise (Steps, Miles, Calories burned, and duration), sleep (restful, light, and awake) data, heart rate, and more. We recommend syncing your smartwatch to the app at least once a day.

Enable the auto-sync feature to sync data from your watch to your phone.

Go to Device > Smartwatch Settings > Auto-sync data. Each time you open the iTECH Wearables app, your smartwatch will sync automatically when it's nearby.

BASICS

Learn how to best navigate your iTECH Fusion Smartwatch.

Navigate iTECH Fusion

iTECH Fusion has a vibrant LCD display and a one-touch button for navigation.

Navigate iTECH Fusion by pressing the  button. The home screen is the watch face of the smartwatch.

- Press the  button to switch between apps on your smartwatch.
- Hold the  button to select and activate an app, function or feature such as, stopwatch, sports mode, heart rate and powering off your smartwatch.
- Hold the  button on the home screen of your smartwatch to switch the clock face to a desired style.

Apps on Your iTech Fusion

Apps and Features

Notifications & Messaging

iTECH Fusion can display call, text, social media, and app notifications from your smartphone to keep you informed. The smartwatch and phone device must be within Bluetooth range of each other to receive such notifications.

Set up notifications: Check that the Bluetooth on your phone is on and that your phone can receive notifications (under Settings > Notifications). Then set up notifications:

1. From the iTECH Wearables app dashboard, tap the **Device** icon from the navigation bar below. Tap **Notifications**.
2. From **Notifications**, you may select the notifications you wish to receive from your smartwatch.

Viewing incoming notifications: When your iTECH Fusion and smartphone are within range, notifications cause the smartwatch to vibrate. If you don't read the notification when it arrives, you can check it later by navigating to **Notifications** on your smartwatch.

To view messages and notifications from different social applications, simply hold  button.

Manage Notifications: Your iTECH Fusion smartwatch stores up to 16 notifications, after which the oldest are replaced as you receive new ones.

Turn Off Notifications: Turn off all or certain notifications in the iTECH Wearables app.

Timekeeping

alarm

stopwatch

Alarms vibrate to awake or alert you at a time you have set. Set up to 5 alarms to occur once or on multiple days of the week via the iTECH Wearables app. You can also time events with the stopwatch on your smartwatch.

Apps and Features

Activity Tracking

iTECH Fusion continuously tracks a variety of stats whenever you wear it. The information is then transferred to the iTECH Wearables app every time you sync your smartwatch.

See your stats: Core stats: Steps taken today, calories burned, and distance covered.
Heart rate: Average heart rate measurement.

Find your complete history and other information detected by your smartwatch, such as sleep data in the iTECH Wearables app.

Track a daily activity goal: iTECH Fusion tracks your progress towards a daily activity goal of your choice. Set goals for sleep, steps, distance, calories, weight, and water intake.

Setting a goal: Set a goal to help you get started on your health & fitness journey. To begin, your recommended goal is set to take 10,000 steps per day. Choose to change the goal number via the iTECH Wearables app under the profile tab. Tap **Target Steps** to begin setting.

Sedentary Reminder

Turn on reminders to move in the app to set a sedentary reminder alert. You can set the start and end time for the sedentary reminder to be active by going to **Device > Sedentary Reminder**.

Track Your Sleep

Your iTECH Fusion will track your time asleep and sleep stages (light sleep, deep sleep and awake time). To see your sleep score and stats, set your sleep schedule in the **Device** section of the app under **Smartwatch Settings**. When you wake up, your sleep data will appear when you check your app..

Learn about your sleep habits: iTECH Fusion tracks several sleep metrics including the amount of sleep you get and provides you with an overall sleep score and efficiency number for that night. It will track your wake time and your light sleep time along with deep sleep.

Apps and Features

See Your Heart Rate

iTECH Fusion tracks your heart rate throughout the day. To measure and see your real-time heart rate, navigate to the heart rate feature on your smartwatch. Tap and hold  button to start measuring.

During a workout, iTECH Fusion shows your heart rate to help you target the training intensity of your choice.

Adjust your heart-rate setting: To track your heart rate day and night with the iTECH Fusion, navigate to **Device** and tap **Smartwatch Settings** to adjust the **Continuous Heart Rate Interval**. Note: To preserve the battery life, turn off continuous heart rate detection.

FITNESS AND EXERCISE (MULTI-SPORTS MODE)

Sports Mode

Track specific exercise (such as running, football, basketball, soccer, golf, tennis, cycling, and hiking) with the smartwatch and the app to see real-time stats, including heart rate data, calories burned, and elapsed time.

For complete workout stats, recap, route and pace information, make sure to use your smartphone's connected GPS. Review your exercise history via the iTECH Wearables app. Note: The Connected GPS feature on the iTECH Fusion works with the GPS sensors on your nearby phone.

Connected GPS

To use Connected GPS: From the Home page of the app, hit the **Run** button. Then, tap **GO**. After the countdown, connected GPS mode will be enabled until you pause or completely stop it. This screen will showcase your distance, duration, and speed. You will have an option to toggle between this screen and an actual live map of your route. Once completed, you can also view your calories burned by tapping on **View Run Data**.

Camera Remote

Shake For Selfie: To access the camera remote on your iTECH Fusion, first open the **Shake For Selfie** feature in the **Device** settings of the iTECH Wearables app. Hold the  button on the camera feature on your smartwatch or rotate your wrist to snap a photo.

Find Device

Tap **Find Watch** under additional features to vibrate your iTECH Fusion.

WEAR AND CARE

This iTECH Wearables product is meant to be worn all day and night, so it's important to follow a few simple guidelines as you wear and care for your device.

To keep your band clean and your skin happy, we recommend the following tips:

- Clean your band and wrist regularly - especially after intense workouts or sweating.
- Rinse the band with water or wipe it with a small amount of rubbing alcohol. Do NOT use hand soap, dish soap, hand sanitizer, cleaning wipes or household cleaners, which could get trapped beneath the band and irritate your skin.
- Always pat dry the band before putting it back on

Note: Although the iTECH Fusion is IP67 water resistant, it is not IP68 waterproof which means you should not submerge your watch in water deeper than one meter for longer than 30 minutes. We advise not to swim with your smartwatch. However, your iTECH Fusion can withstand many splashes, rain, and daily activities such as washing dishes. If your smartwatch gets wet, we advise you to remove it until dry. It is not good for your skin to wear a wet band for long periods of time.

Make sure to wear your band loosely enough that it can move back and forth on your wrist. Prolonged rubbing and pressure may irritate the skin, so give your wrists a break by removing the band for an hour or two after extended wear.

IMPORTANT TIPS:

If you have allergies, asthma, or eczema, you may be more likely to experience a skin irritation or allergy from a wearable device. If you start to experience skin irritation or redness on your wrist, remove your device. Contact a dermatologist if symptoms persist longer than 2-3 days of not using your wearable device.

UPDATE, RESTART, AND ERASE

If you can't sync your iTECH Fusion, or if you have trouble with connected GPS or tracking your stats, you can power off and restart your tracker from your wrist or app. From the smartwatch, navigate to the turn off screen and hold the one-touch button to turn off your smartwatch. If restarting the smartwatch doesn't address the issue, tap **Factory Reset Smartwatch** in **Device** settings.

REGULATORY & SAFETY NOTICES

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. Caution: Any changes or modifications to this device not explicitly approved by the manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be located or operated in conjunction with any other antenna or transmitter.
